

DOHRNII

**THE FINANCIAL
EMPOWERMENT
PLATFORM**

WHAT IS DOHRNII

The Dohrnii platform brings two of the most important features to support crypto investors. **Education** and **Information**.

With our gamified academy app, crypto investors can learn about the most important aspects of the market and will get rewarded if they complete challenges. We call that **Learn to Earn**.

After gaining enough knowledge, they will be equipped to use our Marketplace. There they can access high quality data and strategies related to the crypto market. They could be looking for information about **on-chain analysis**, whale wallets and smart money movements, technical analysis, community metrics... and more.

The marketplace is our landmark feature, opening the door to an **ecosystem** of content creators and users engaging freely and openly using the Dohrnii **smart contracts**.

HOW IT WORKS

Learn about the crypto industry and gain an investing edge

Participate in quizzes and challenges to win crypto rewards

Access high quality data and strategies on our marketplace

Become a creator and monetise your content on the marketplace

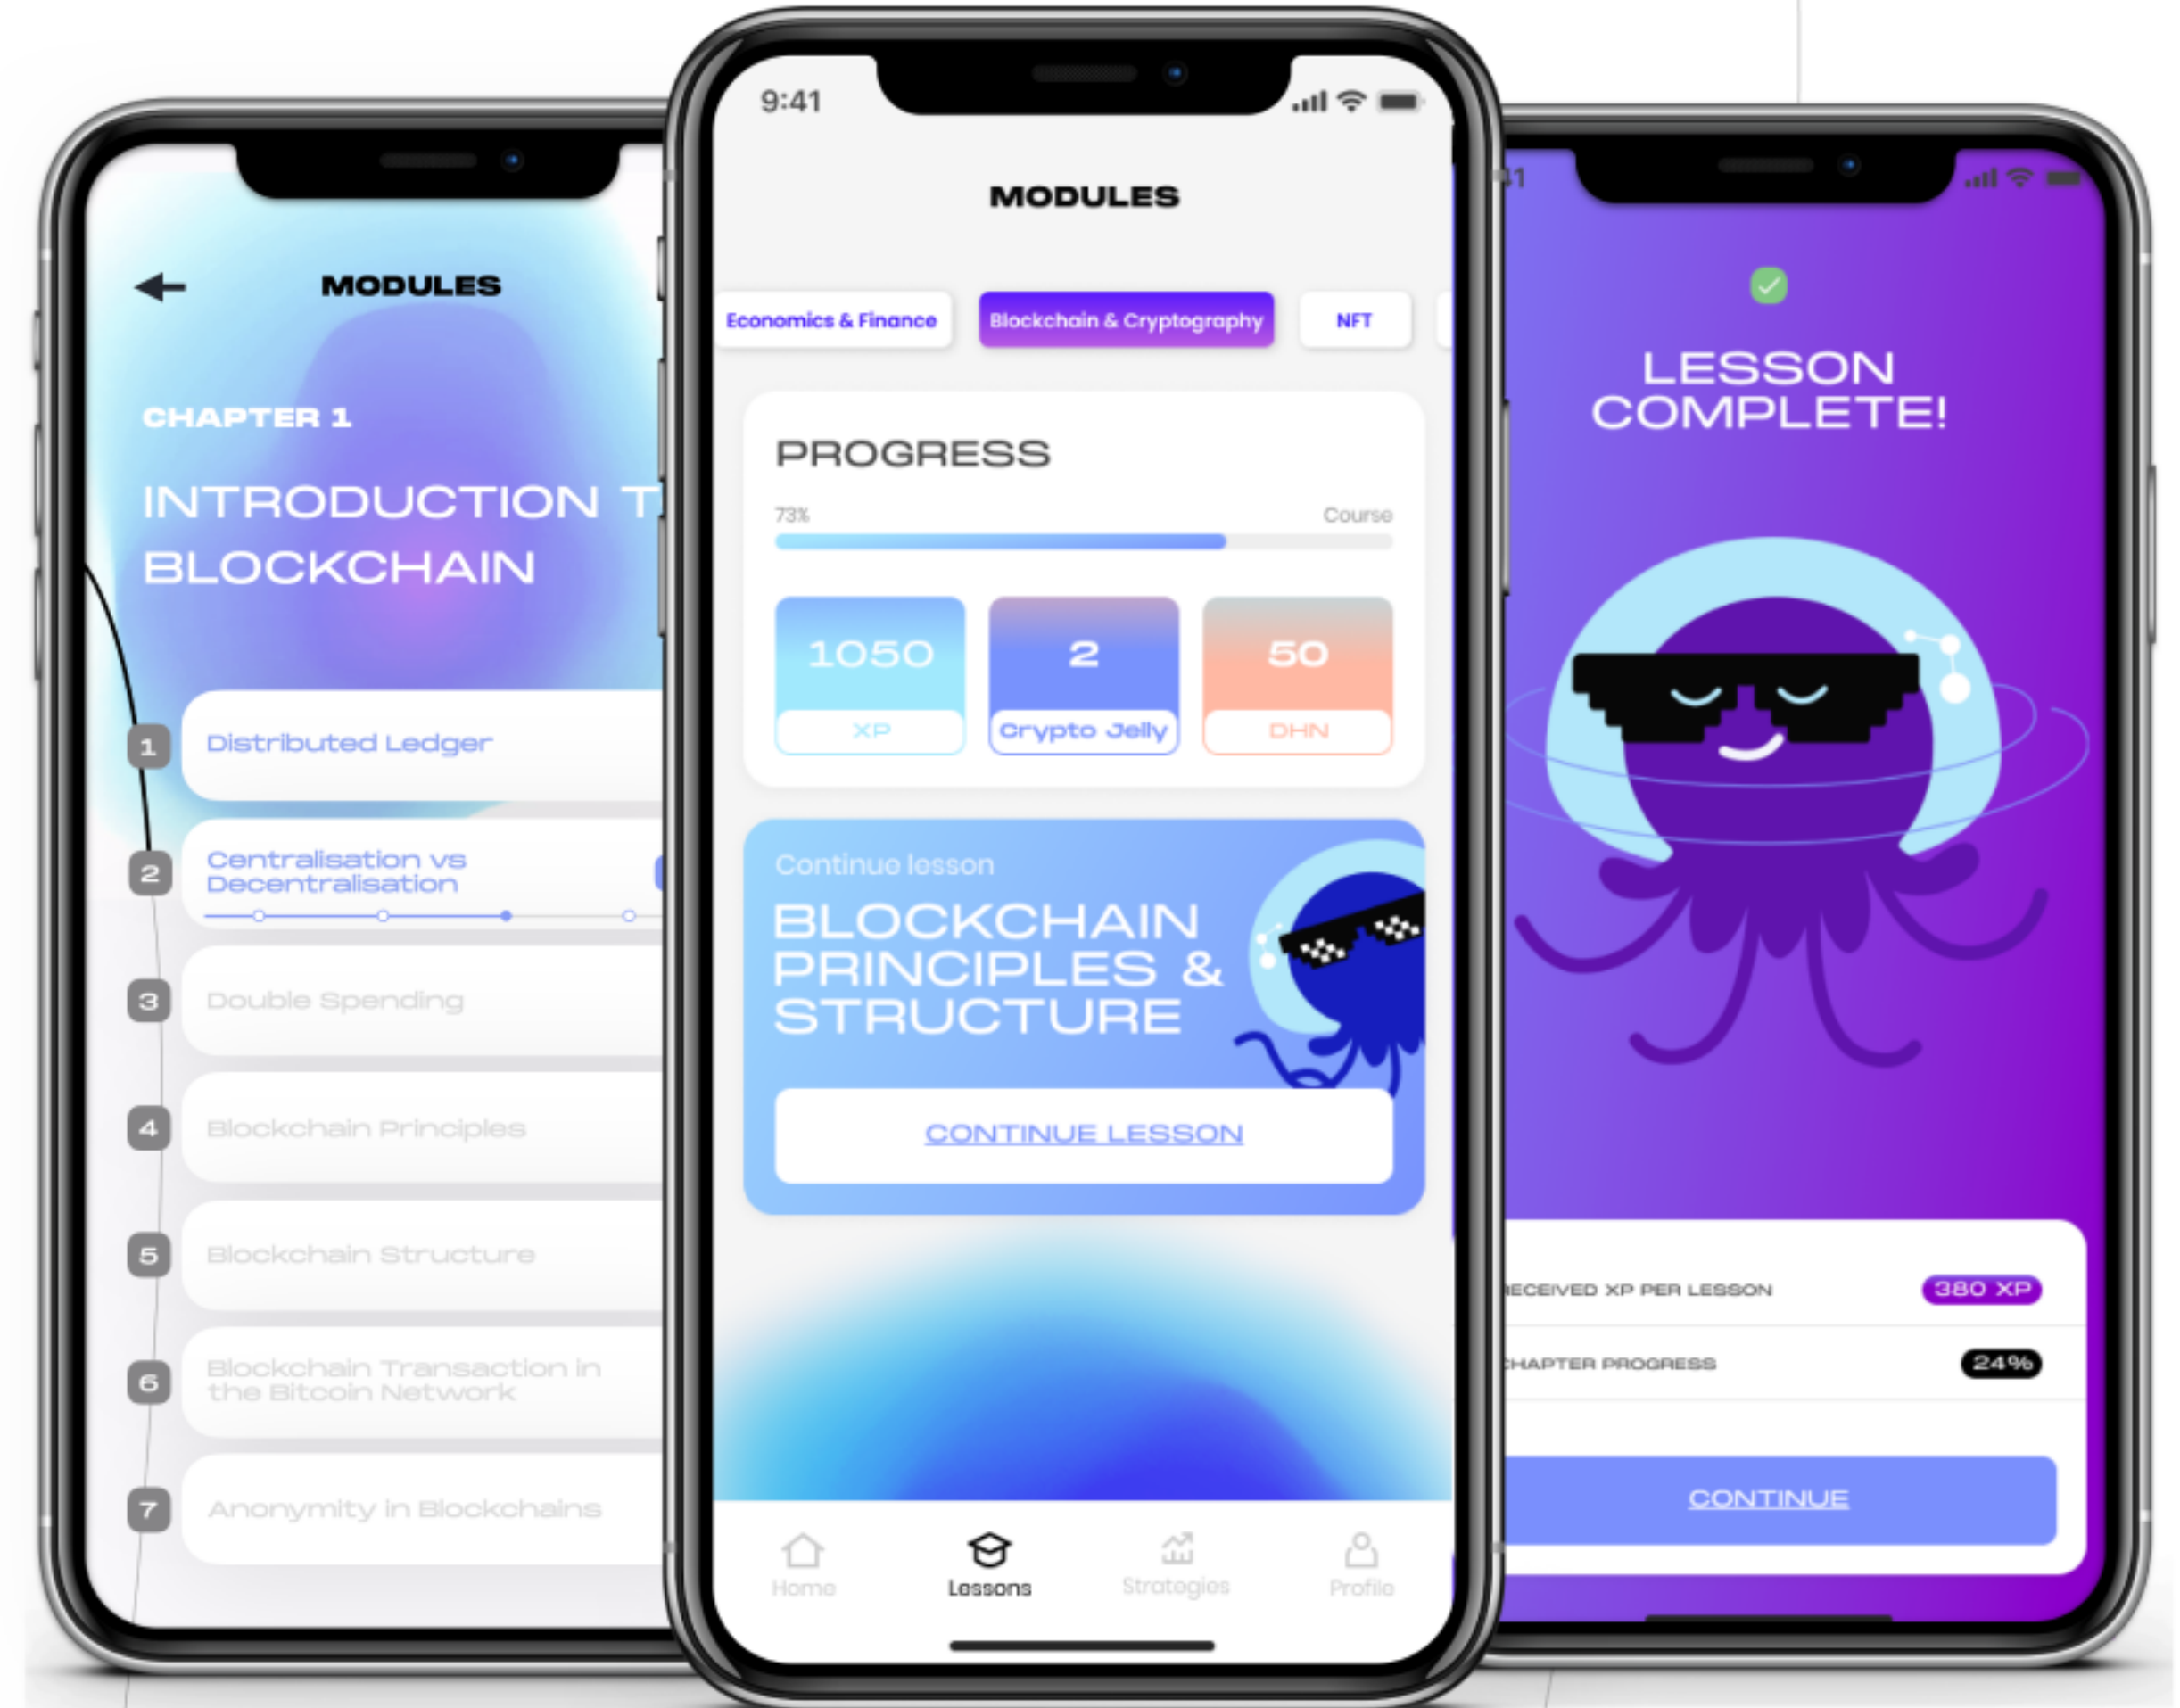

THE DOHRNII ACADEMY

LEARN & EARN CRYPTO

The Academy is where crypto investors go to learn about different crypto topics. Highly **gamified**, the objective is to deliver the content in a way that is engaging and relevant.

The curriculum is curated by university **professors** to ensure only the highest quality content. The Academy uses a Learn to Earn system which rewards users as they progress through the lessons. Users are also able to challenge each other and compete to **win crypto prizes**.

Turning the education system upside down with our **Learn to Earn** model

THE DOHRNII MARKETPLACE

The first marketplace focused around the exchange of **data and strategies** for the crypto industry.

The Marketplace is a platform that focuses around the exchange of crypto content, in the form of datasets or strategies.

Today most of this exchange happens on platforms that are **not optimised** to that effect. Content creators find it hard to monetize their content and users find it hard to filter between the good and the bad with all the noise.

The objective of the marketplace is to give crypto investors a place where they can access and **unlock high quality** data and strategies in an open way.

THE DOHRNII WALLET

Dohrnii is also developing its own blockchain wallet. The wallet will enable users to have a better experience while using the Dohrnii platforms.

Compatibility

- VeChain
- Ethereum
- Binance Smart Chain
- Matic Polygon
- Bitcoin

Functionalities

- Store, view, send and receive tokens
- Native Staking on the app - only available for the DHN token
- Web browser - App integration for Dex & Swaps

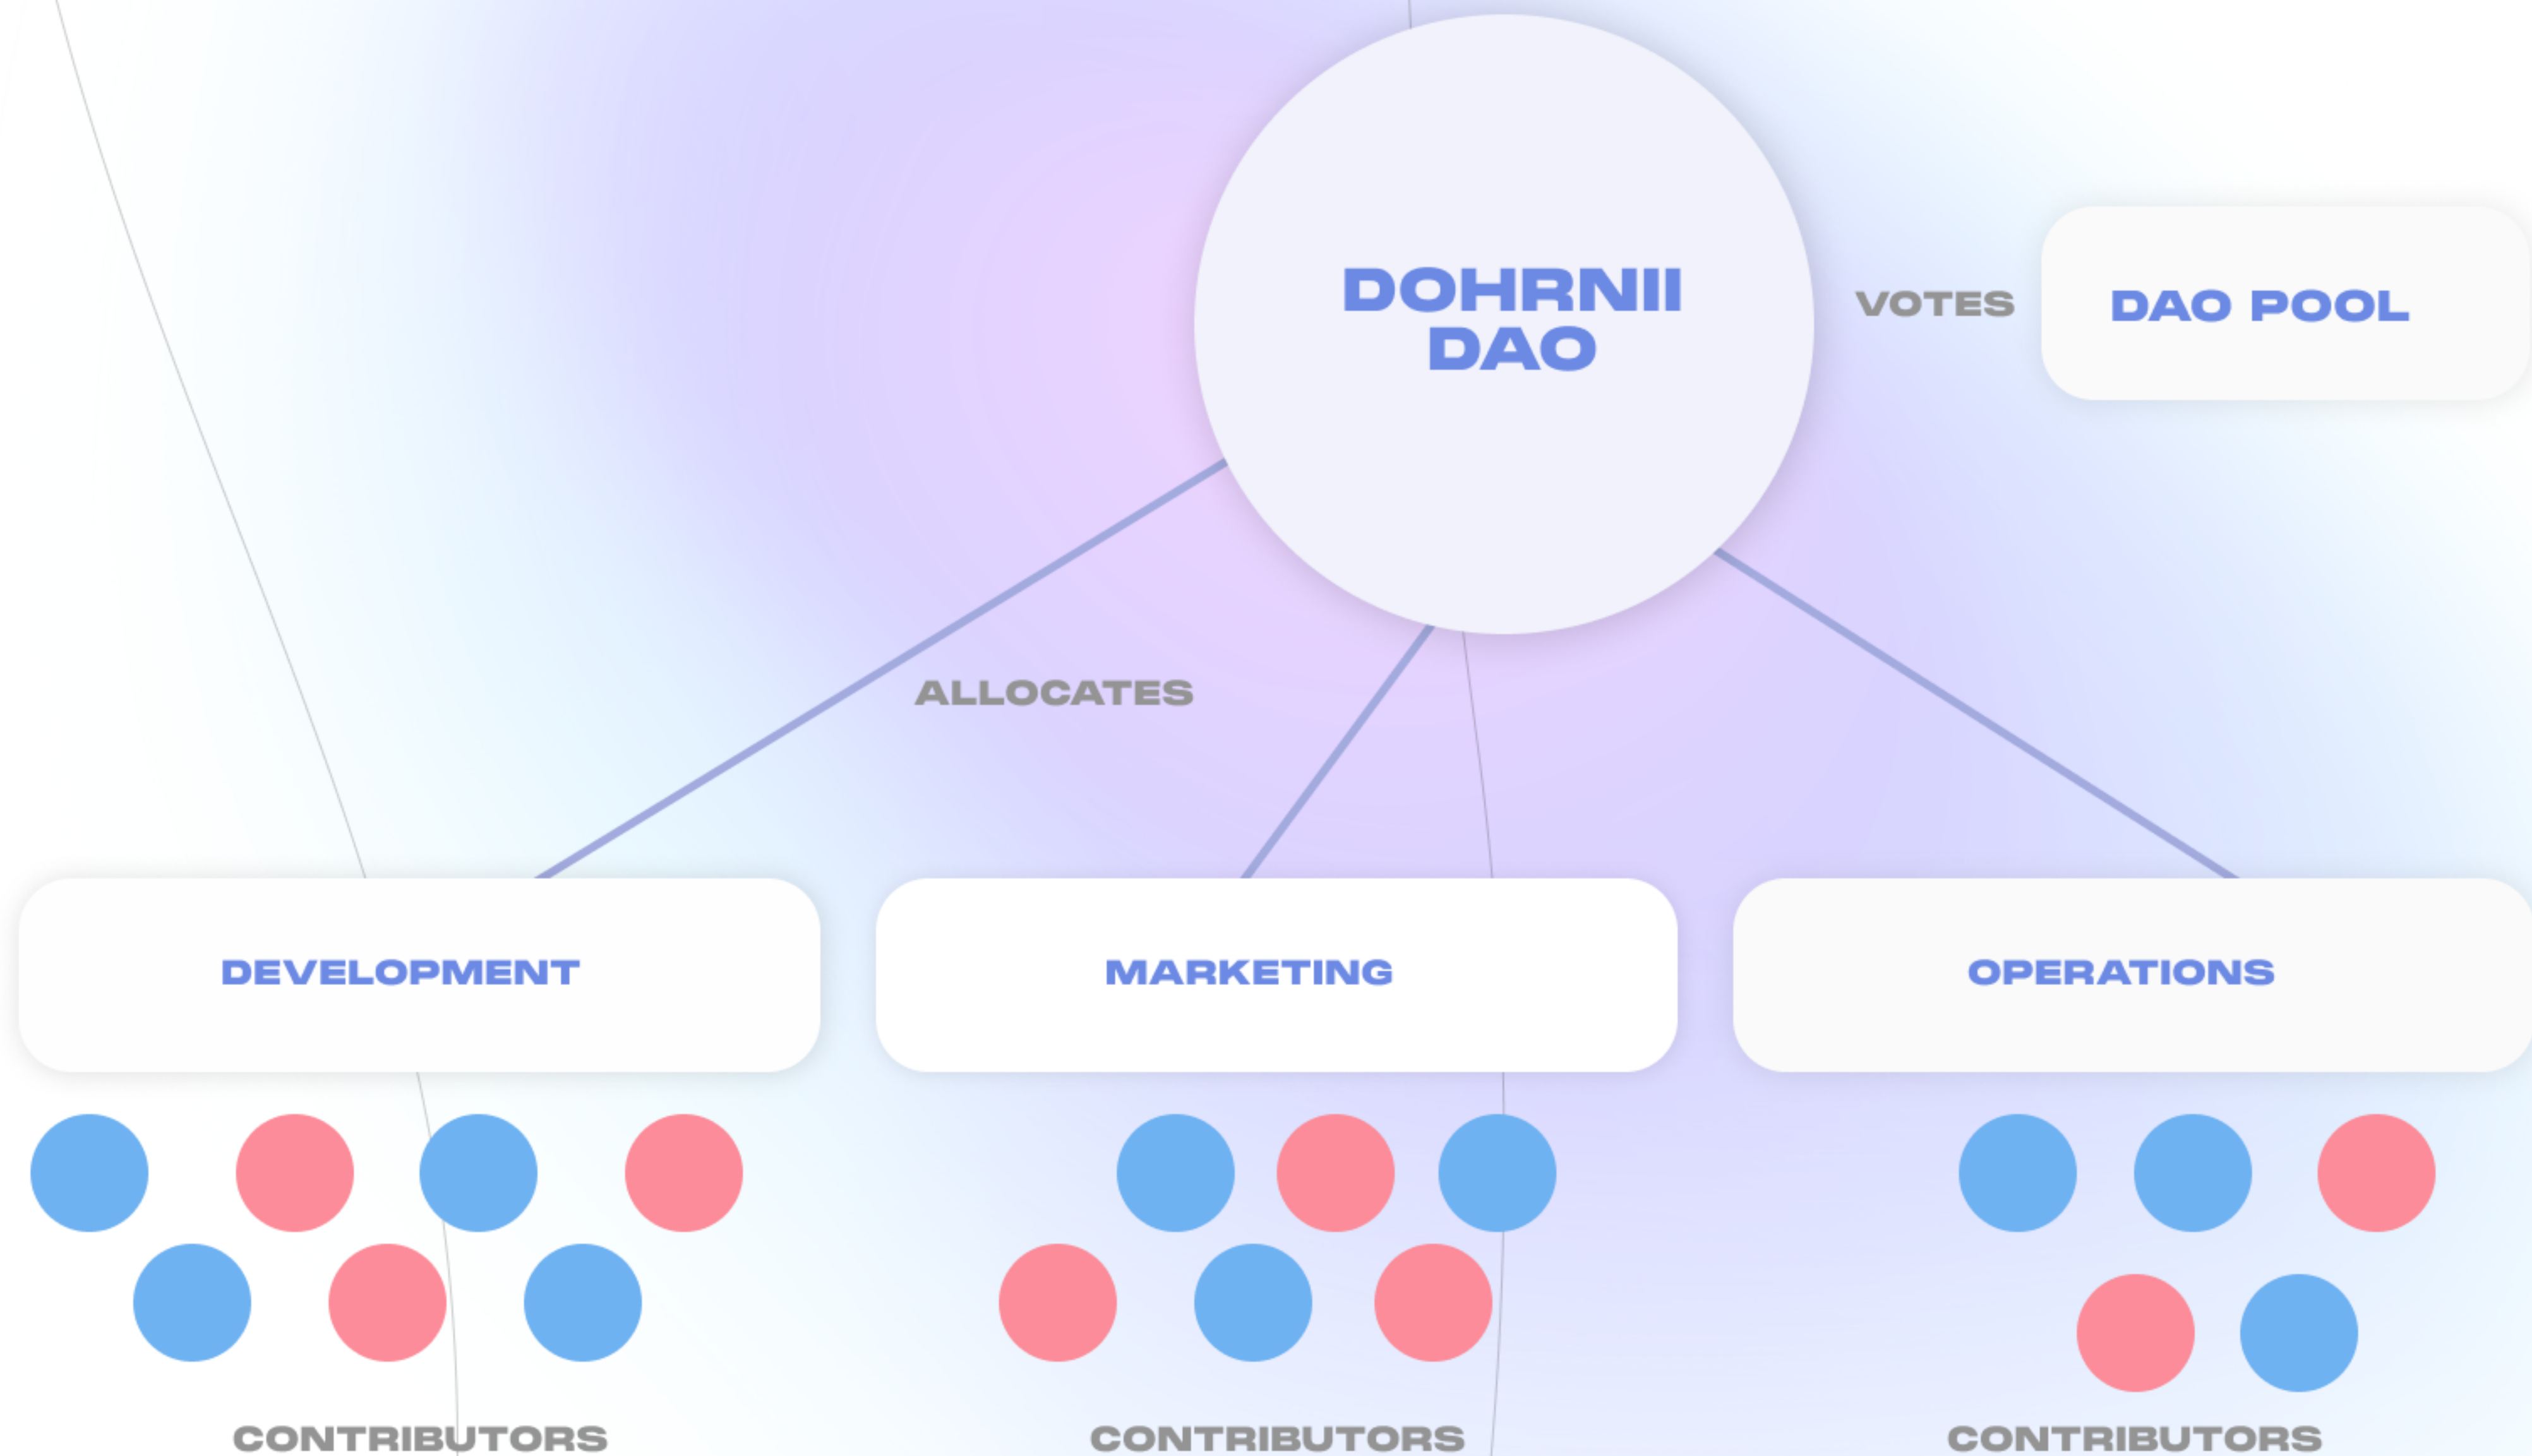

THE DHN TOKEN

DHN is the token that powers the Dohrnii ecosystem and allows users to get the most out of the platform. \$DHN is a **multichain utility token** available on Ethereum, Binance Smart Chain, VeChain and Matic.

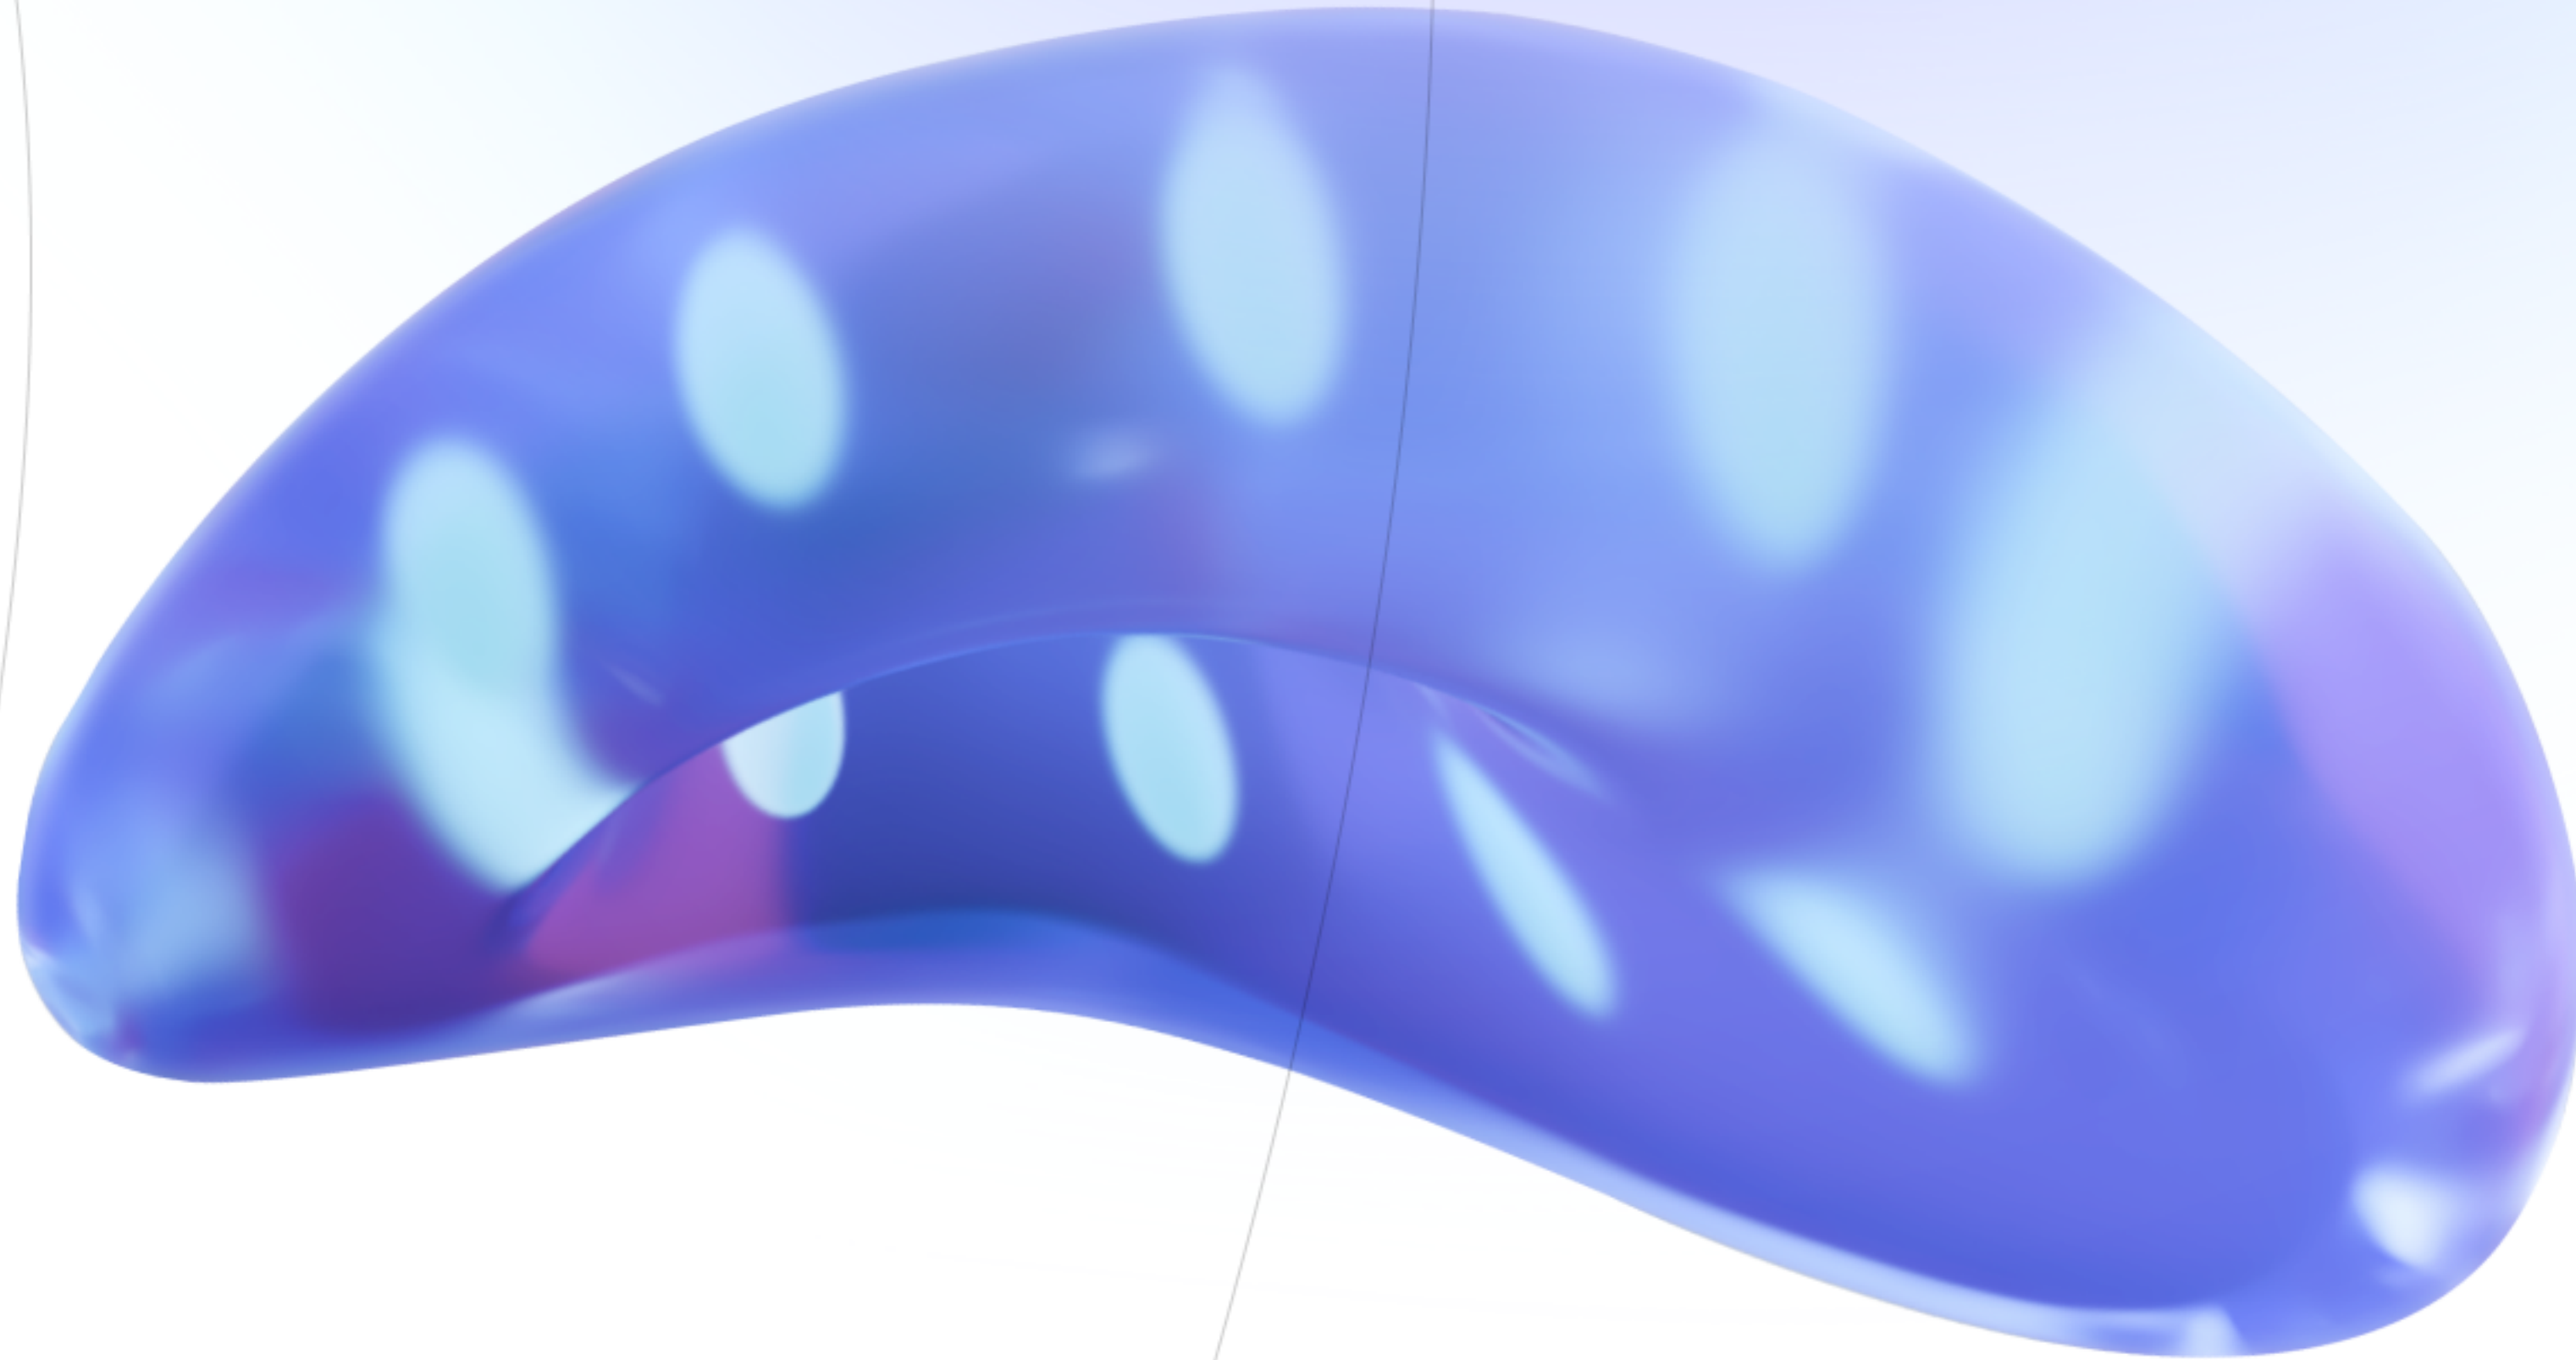

The token plays a vital role in empowering crypto investors. It incentivizes all participants to contribute to the ecosystem, and supports the creation of a compensation framework as the core driver of growth for the platform.
